**Fisheries Ecosystem Based Management in Aqaba, Jordan: From Community Engaged
Monitoring to Management Strategies**

الاثنين، 23 أيار 2022 Monday, May 23rd 2022

العقبة، الأردن Aqaba, Jordan

Workshop Objective: The workshop objective is to discuss fisheries management practices in Aqaba, Jordan based on seven years of fishing monitoring results 2014-2021. The workshop marks the first intervention of the fishermen community in Aqaba to effectively engage in a management participatory approach for protecting the fish stocks and developing sustainable fishing strategies. This is a common objective between MED4EBM Project and Aqaba Marine Reserve Management. The workshop is thus a first episode in a chain of discussions with the concerned communities targeting better protected coastal and marine ecosystem and improved returns of the ecosystem services
