BRIEF DESCRIPTION OF COMPANY & KEY COMPETITIVE ADVANTAGE PARAMETERS	
<p><i>This family business is located in Frenaros. Our business has passed on to the second generation since our father has been a beekeeper since he lived in the occupied village of Agia Triada. Today, with Mr. Christos as a teacher, the children are engaged in beekeeping. The company is constantly growing by producing its products such as honey, pollen, honeycomb and ointments, always with all the sanitary measures. The goal is in the near future to organise workshops for beeswax, presentations for the bee and visits to the apiary.</i></p>

t/phone: 99 458980	
fax: 26 652222	
Contact person: Polydoros Costa	
BRIEF DESCRIPTION OF COMPANY & KEY COMPETITIVE ADVANTAGE PARAMETERS	
<p><i>Our story begins with the unchanged nature of the area of Agioi Anargyroi of the village of Miliou in Paphos, where Petros Dionysiou comes from, who carries a tradition of many years in beekeeping, from 1975 until today. A tradition that with love and passion has surpassed all expected goals and has become a way of life, has turned our mission into a vision of value, quality and trust.</i></p> <p><i>Agioi Anargyroi honey was honored with gold awards for taste and quality at the London International Honey Quality Awards and Taste Olymp Awards for 2019, 2020 and 2021. It managed to win eight international gold awards within three years. This proves the excellent quality we offer you through our pure world. Honor for the Agioi Anargyroi family but also for the Genuine Cypriot Honey.</i></p>	
COMPETITIVE ADVANTAGE	
<p><i>The honey and the beekeeping products of the "Agioi Anargyroi" family are pure and natural, without antibiotics, without admixtures with other substances, while maintaining their beneficial properties. This is also our philosophy, the offer of bee products directly from the hive to you with the minimum human intervention that aims to produce high quality bee products, with respect and sensitivity towards the environment and the consumer.</i></p>

development. As an activist, Mrs. Georgia has returned to the rural area of Larnaka and feels the need to share the knowledge and beauty of Cyprus nature with others. She strongly believes that the rural Cyprus environment is astonishing!

Products:

- ▣ Regular blossom honey. Pure honey from wild flowers of Larnaka mountains.
- ▣ Unboiled blossom honey. Pure unboiled honey from wild flowers of the mountains of Larnaka. Unboiled honey comes directly from the hives without any process, that is why it keeps all its benefits and nutrients. After a few months from harvesting, the texture of unboiled honey becomes reach and creamy, it gets crystallised naturally.
- ▣ Honeycomb from our hives with all the beneficial properties of beeswax.
- ▣ Pollen
- ▣ Royal jelly
- ▣ Beeswax ointments (Balms)
- ▣ Beeswax candles. Candles from 100% pure beeswax, without any chemicals, ecological, non-toxic, they purify the air, they are hypo allergic and help people with seasonal allergies or asthma. They have a pleasant natural smell from honey and the nectar of flowers. They melt slower than the common candles without any smoke.

Kalavassos, Cyprus GAIA OLEA

Wax based artisan cosmetics

COMPANY ADDRESS DETAILS

Address: 5, 1is Apriliou, Kalavassos, Cyprus

Email: metta@gaaolea.com

t/phone: 99675618

Contact person: Elsie XatziPavlou

BRIEF DESCRIPTION OF COMPANY & KEY COMPETITIVE ADVANTAGE PARAMETERS

Gaia Olea was born out of our love for essential oils, herbs, vegetable oils, clays and other natural ingredients in Kalavassos, a small village in the Mediterranean island of Cyprus. After studying and experimenting with these natural ingredients for a few years, in 2013 we decided to start sharing our products with the rest of the world.

Our soaps, balms, healing salves, therapeutic oils, lotions and other body care products are handmade exclusively with natural ingredients and in small batches, filled with metta vibrations.

This project reflects our love for mother nature and our need to ensure that our products do not harm us, other people, animals or the environment, so every effort is being made to source organic, fair trade, sustainable, ethically and locally produced ingredients when possible.

Main ingredients used are olive oil, beeswax, pure essential oils and handpicked herbs from Cyprus. We also incorporate selected ingredients from around the world such as activated hemp charcoal from Japan, gardenia oil from Tahiti, shea butter from Africa, neem oil from India, green clay from France and turmeric from Thailand.

Most of the packaging used is recyclable and/or reusable and none of the products has been tested on animals. All of the products contain exclusively 100% natural ingredients and do not contain any palm oil, parabens, petroleum, silicones, sulphates, phthalates, synthetic preservatives or fragrances.

This document has been produced with the financial assistance of the European Union under the ENI CBC Mediterranean Sea Basin Programme. MedBEEsInessHubs

Gaia Olea is run by Elsie, an aromatherapist and a holistic therapies practitioner with the help of her partner Zenonas. But so many friends are involved in our project, either by providing us with raw materials they produce, or by helping us with creating our labels, packaging, photography and website, so we feel that Gaia Olea is a project based on cooperation between friends.

The name we choose for our products is a combination of two beautiful words;

Gaia, which in Greek mythology is goddess Earth, the Mother of all and Olea which is the scientific name for Olive Tree, that gives us our favorite ingredient, organic olive oil which is of our own produce and can be found in almost all of our products.

We hope you will love our products as much as we do!

BRIEF DESCRIPTION OF COMPANY & KEY COMPETITIVE ADVANTAGE PARAMETERS

Natural, handmade cosmetics

An idea that started in the fall of 2014, in a home kitchen, with a single hand mixer and with raw materials love, passion and respect for the environment, was to be the beginning of Bee Spa by Melissokampos. A small business of natural, handmade soap and ointment, made with dedication in a certified laboratory in Nicosia, based on modern standards.

The idea of creating this endeavor arose through the personal need of the business owner to make products that she and her own people trust first to use them. Today, six years later, it has managed to realize a dream of years and, following all the procedures set by the European Union and the Republic of Cyprus, to create a separate range of products based on natural raw materials.

Extra virgin olive oil, honey and beeswax dominate the certified, handmade cosmetics of Bee Spa by Melissokampos. The cold method is used for the preparation of soaps, so that the components of the oils do not strain thermally and keep their nourishing elements intact. In addition to honey, soaps are enriched with coconut milk, wine and beer, as well as valuable essential oils, depending on the action attributed to them, and left to mature for at least a month, until they are ready to be used on the skin. They do not contain any additives, dyes or fragrances. In the range of soaps, you will find bars with essential oils of mint and orange, cedar, cinnamon, geranium and lavender.

The ointments are 100% natural, made from extra virgin olive oil, beeswax and essential oils, and have beneficial properties for the body, as they moisturize, regenerate and give it shine and elasticity. Chios mastic oil ointment is extremely moisturizing for the hands and body,

while the line is completed by lavender for rest, smooth feet for soft and relaxed feet and the orange lip balm that nourishes and moisturizes the lips.

The products leave no residue in the environment and all packaging comes from recyclable materials and is recycled. Environmental protection is a key principle for Bee Spa by Melissokampos. After all, this product also stands for: a clean environment, without chemicals, where there is respect for natural resources and not their exploitation or waste. This is what our skin needs and needs - the return to nature.

BRIEF DESCRIPTION OF COMPANY & KEY COMPETITIVE ADVANTAGE PARAMETERS	
EM MELI was founded less than a year ago and at this moment only has 3 cells. The hives are of the "Dadant" self-made type and it would be a pleasure to share with other fellow beekeepers the positive and practical results. Our goal is to have healthy and strong bees in a population on a stable basis and not nomadic beekeeping! From these we have already collected propolis and along the way we will deal with other products such as royal jelly and wax of course! We plan to produce honey in the middle or the end of summer after the end of the flowering of the thyme thruhi.
