

The project expected results can be classified in three main categories:

1. Innovative approaches, strategies and tools for the creation of a proper innovation ecosystem that, tailored on the specific characteristics of each territory, is able to boost innovation,

2. Methodologies and means for enhancing competencies, capacities and skills of decision and policy makers in the local and national governmental departments in charge of territorial and economic development,

3. Concrete examples of methodologies and tools application.

MED-QUAD

MEDiterranean QUadruple helix  
Approach to Digitalisation

“The core aim of the project is to nurture the innovation potential of the region, by building up a crossborder cooperation scheme of the Quadruple Helix approach”
