

SEACAP 4 SDG

STEPPING Mediterranean EPC Guidelines (MEG)

The SEACAP4SDG project aims to reduce energy consumption in public buildings through cost-effective approaches to energy refurbishment, integrating Sustainable Energy Access and Climate Action Plans and innovative financial mechanisms

AIM AND POTENTIAL: The guidance aims to provide step-by-step guidance for the energy retrofitting of public buildings in the MED area through the use of Energy Performance Contracts taking into consideration the intrinsic characteristics of the region. The main potential is that the document is based on the outcomes and lessons learnt during the energy retrofitting of selected public buildings with EPC in 7 countries tailoring the process to the MED conditions.

TYPE: Methodology

CATEGORY: Procurement and finance

STAKEHOLDERS: Local, national and regional public authorities, SME, enterprise except SME, sectorial agency

SCOPE: Public buildings

LEVEL OF REPLICABILITY: High

AVAILABLE LANGUAGES: English

SUCCESSFUL CASES AND CONSTRAINTS: The guidelines have been successfully tested in Spain, Portugal, France, Italy, Malta, Slovenia and Greece. The implementation in other territories or typologies might require adaptations to context or regulations.

RELATED RESOURCES: Stepping platform, Training Package and EPC simulation Tool
